CI Flexo Printing Machine

• Outstanding Features

Machine Mechanism

1. Sleeve cylinder quickly changes due to advanced shaftless flexo cylinder design.
2. Reduce wastes by utilizing pre-register positioning system.
3. Reduce job changeover time on unwind & rewind stands through the shaftless roll clamping mechanism.
4. High speed & ultra fast printing job change without stopping the machine.
5. Double layer dryer with adjustable temperature controls and fans & exhaust system.

Electro Control Design

1. Main & sub transmission system are fully micro-computerized PLC programmed & controlled.
2. Man/Machine interface controller with simple, easy to use operator controls.
3. Advanced drive system provides superior web tension control, requires less maintenance, and reduces waste.

• Applications

Our CI flexo printing machine is applicable to print CPP, OPP, PET, PE, PVC, Nylon film, paper, aluminum foil and cellophane.....etc.

• Optional Equipment

1. Mounting machine
2. Plate sleeve & anilox sleeve systems

• Technical Parameters

Web width range	600 to 1500 mm
Color	4 to 8 color
Machine speed	200 to 350 m/min
Printing speed	150 to 300 m/min
Unwind and Rewind diameter	φ600 mm φ800 mm φ1000 mm

Design & Production are available for special specifications.
