# Coating Machine

## Applications

Our coating machine is applicable to coating paper, plastic film, aluminum foil, OPP, PET, kraft paper, laminating FILM..... etc.

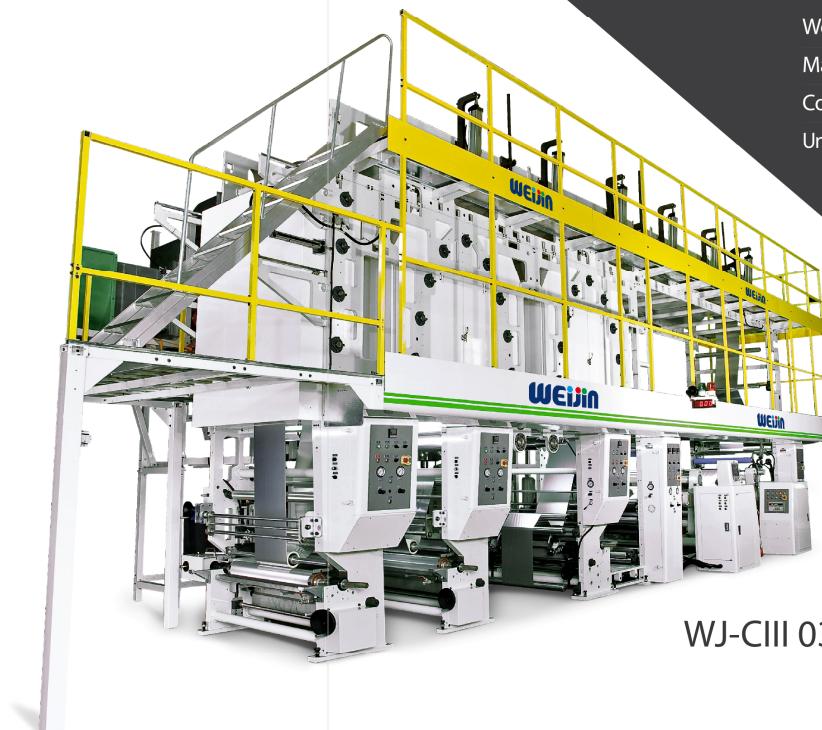

## Outstanding Features

### 1. Machine Mechanism

1. Advanced automatic splicing & feeding mechanism - Allow for high speed & ultra fast coating job changes without stopping the machine.
2. Pneumatic control impression roller - Easy to operate both up & down
3. Double layer drying system with high load capacities and adjustable temperature controls make efficient drying possible.
4. Materials are loaded or unloaded by air shafts.

### 2. Electro Control Design

1. Main & sub transmission system are fully micro-computerized PLC programmed & controlled.
2. PLC control system enables the coating equipment to be sensitive, precise and easy operating.
3. Man/Machine interface controller with simple, easy to use operator controls.
4. Advanced drive system provides superior web tension control, requires less maintenance, and reduces waste.

WJ-CIII 01

## Technical Parameters

Web width range	600mm to 1600mm
Machine speed	100m /min - 280m /min
Coating speed	60m /min - 250m /min
Unwinding and Rewinding diameter	Φ600mm Φ800mm

• Design & Production are available for special specifications.
